

Case Study

Using Telepresence at Xerox Audio Visual Solutions

Face-to-face meetings with people on the road is on-the-spot with telepresence technology.

Telepresence can reduce scheduling meeting frustrations.

As I mentioned before, I run an organization with numerous field offices that require our key headquarters staff to be on the road on a regular basis. This created a problem trying to schedule meetings as a lot of time we're not all in the Atlanta Headquarters' office at the same time. However, now that all our offices are tied together through telepresence, it really is very easy to schedule meetings as those "on the road" can join those at Headquarters without changing their travel schedules.

If this seems like an application that would benefit your organization, we will be glad to set up a personal demonstration for you about how telepresence can make your business more efficient and effective.
